## PROFILE

Computer Science and Engineering undergraduate with a strong foundation in **software engineering** and hands-on experience developing **full-stack applications** and **applied machine learning** solutions. Experienced with **React, Node.js, Express.js, and MongoDB**, with practical expertise in **RESTful API development**, secure authentication, database modelling, and external API integration. Adept at designing and implementing scalable, maintainable solutions to technical problems, with demonstrated strengths in analytical thinking, project execution, and cross-functional team collaboration.

## TECHNICAL SKILLS

**Programming:** Python, JavaScript, C++

**Web & Backend:** React, Node.js, Express.js, FastAPI, MERN Stack, REST APIs, TailwindCSS, JWT Authentication

**AI/ML & Data:** PyTorch, TensorFlow, Keras, Scikit-learn, Data Analysis

**Databases & Tools:** MongoDB, MySQL, SQLite, Git, GitHub, PyOpenGL, Third-party API Integration

**Core CS:** Data Structures & Algorithms, OOP, Database Systems, Operating Systems, Computer Networks, Computer Architecture, Computer Graphics, Software Engineering

## PROJECTS

### RentNest — House & Apartment Rental System

[GitHub]

- Developed a full-stack **MERN stack** rental platform covering the complete listing-to-booking lifecycle.
- Implemented **JWT authentication** with **role-based access control** for Tenant, Landlord, and Admin permissions.
- Designed property listing, search, and **multi-criteria filtering** over **REST APIs** and MongoDB schemas, with booking and rental application workflows featuring status tracking, **in-app messaging**, and wishlists.

### TravelMate — Smart Travel Planner

[GitHub]

- Built a trip-planning application with **React, TailwindCSS, Node.js, and MongoDB**, exposing REST APIs for itinerary and budget data.
- Integrated **OpenWeather, currency exchange, flight, and Google Maps APIs**, normalising asynchronous external responses.
- Engineered a **personalised dashboard** consolidating trip summaries, weather, flight details, and spending insights, with **PDF export** for downloadable itineraries and budget reports.

### 3D Survival Shooter — Real-Time Game Engine Project

[GitHub]

- Engineered a **real-time 3D game** in **Python** with **PyOpenGL**, implementing the render loop, input handling, and state management.
- Implemented **enemy AI** with three behaviour types (Normal, Fast, Tank) plus **dynamic difficulty scaling** across multiple levels.
- Designed a combat and **collision-detection** system with shooting, player health, and scoring, extended with **power-ups**, safe zones, a HUD, cheat mode, and multiple camera modes.

## EDUCATION

### Bachelor of Science in Computer Science & Engineering (CSE)

[Apr 2022 – Present]

BRAC University, Dhaka

CGPA: **3.10 / 4.00**

### Higher Secondary Certificate (HSC)

[2018 – 2020]

Govt Shah Sultan College, Bogra

GPA: **5.00 / 5.00**

### Secondary School Certificate (SSC)

[2010 – 2018]

Bogra Zilla School, Bogra

GPA: **5.00 / 5.00**

## LEADERSHIP & EXTRACURRICULAR ACTIVITIES

### BRAC University Computer Club (BUCC)

Apr 2024 – Dec 2024

Assistant Director, Event Management Department

Dhaka, Bangladesh

- Coordinated event management activities for a club of **300+ members**, aligning execution with organisational goals.
- Collaborated with **faculty advisors** and cross-departmental teams to deliver **university-scale events**.

### Robotics Club of BRAC University (ROBU)

Apr 2022 – Dec 2023

Junior Executive, Event Management Department

Dhaka, Bangladesh

- Supported **recruitment, onboarding, and task coordination**, maintaining documentation and internal communication for event logistics.

## ACHIEVEMENTS

- Solved **200+** algorithmic problems on **HackerRank**, demonstrating strong data-structures proficiency.
- Placed **6th** in the **Intra BRAC University Programming Contest**, 2022.
- Awarded the **Duke of Edinburgh's International Award (Bronze)**, recognised as **Best Camper**.
